Warnings and Cautions

This software can be used to design paradigms for magnetoencephalography (MEG), electroencephalography (EEG) and functional resonance imaging (fMRI).

The following warnings and cautions appear in this guide. Please ensure you are aware of all the operations and interpretations.

General Information

The File menu includes all the functions for edit the stimuli and trials (presentations).

New

It makes a file.

Open

It opens an existing file.

Close

It closes the active document.

Save

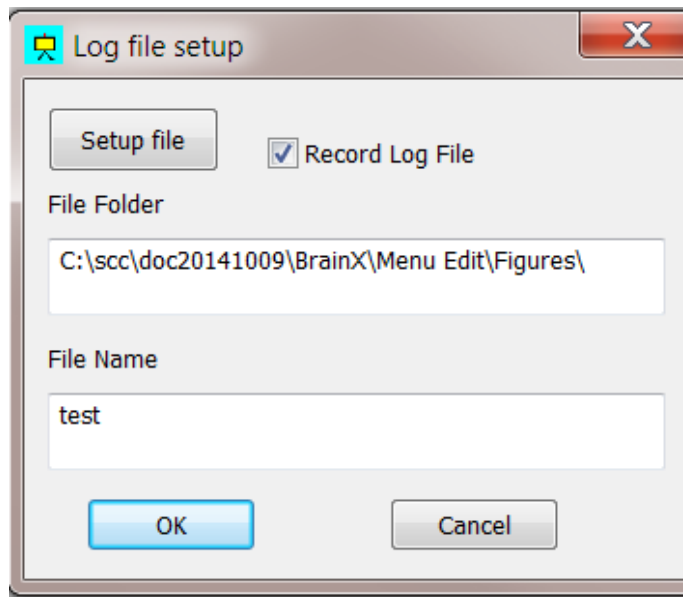

It saves the active document.

Save As

It saves the active document as a new file.

Setup Log File

It allows users to setup the path and name to record log file. The log file can record the time of presentation (e.g. name, trigger).

To setup the path and name, it is necessary to “save” a simple file so as to test if it is writable. Therefore, please check the file folder and the file name.

*Please make sure the Record Log File is checked.

R *when the paradigm start, a new file name will be made by combining “File name + time”.

Exit

It exits the current program.
